The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include the discovery of fire, extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering ...

For incorrect answers on practice problems, students should watch the solutions. Then they are ready to tackle the more comprehensive problem set that includes continual review of previously-learned concepts. Problem sets, as with practice problems, are shown on the screen and students enter answers on the computer.
