[Estimation and postestimation commands - Stata](#)

- Many users of Stata seem to have been reluctant to adopt the margins command.
- The manual entry is long, the options are daunting, the output is sometimes unintelligible, and the advantages over older and simpler commands like `adjust` and `mfx` are not always understood

Stata 11 introduced new tools for making such calculations—factor variables and the margins command. These can do most of the things that were previously done by Stata’s own `adjust` and `mfx` commands, and much more. Unfortunately, the complexity of the margins syntax, the daunting 50-page reference manual entry that describes it,

*We have made some improvements to putexcel in Stata 14.2, so you will want to update your copy of Stata to run the examples below. You may recall that Kevin Crow has written two blog posts about putexcel titled *Export tables to Excel* and *Retaining an Excel cell's format when using putexcel* .*

[*FPDF*](#)

The -margins- command is, in my experience, one of the top ten most useful commands in all of Stata. So I recommend you abandon your use of -xi-, and even try to forget you ever knew about it. Another aside: after you have -xtset industry year-, it does not make sense to include industry indicators among the variables in your random effects model.

Video Abstract BACKGROUND: The American Academy of Pediatrics (AAP) revised its infant vitamin D intake guidelines in 2008. We aimed to

examine previously unexplored trends in meeting vitamin D intake guidelines among US infants since 2009 and whether there were differences across demographic subgroups. METHODS: We analyzed dietary recall data for infants 0 to 11 months in the 2009–2016 NHANES.

Narcissus is a genus of predominantly spring flowering perennial plants of the amaryllis family, Amaryllidaceae. Various common names including daffodil, narcissus and jonquil are used to describe all or some members of the genus. Narcissus has conspicuous flowers with six petal-like tepals surmounted by a cup- or trumpet-shaped corona. The flowers are generally white or yellow (also orange or ...
